

State of the Art Manufacturing Facility

Portable and Inexpensive

Cylinders are designed to be light and portable.
There are no deposits or rental charges.

Quality Assurance

Each cylinder is labeled with a serial number and expiration date. The stability of each mix is guaranteed.
Each cylinder comes with serial number and Certificate of Analysis.

Rapid Delivery

Stock items shipped within 3 working days.

PRESET CONSTANT FLOW REGULATORS 100 Series

Portagas™ offers unequalled quality and performance from its constant flow regulators. With their unique diaphragm design, these regulators will hold their preset flow, even as the cylinder pressure is depleted.

FLOW MATCHING REGULATOR™ DEVICE

Portagas demonstrates a commitment to calibration innovation for the Environmental and Industrial Hygiene markets by being the first to develop a Flow Matching Regulator™. Designed for instruments with sample draw pumps, the Flow Matching Regulator™ is an excellent solution to overcome the inconveniences of using sample bags or inefficient T-assemblies. The Flow Matching Regulator™ will also provide excellent repeatability of sensor response to the calibration gas opposed to sampling bags.
