

WireFree and Wired Gas Detection

Wired Detectors with 4-20mA, RS-485 Modbus and optional relays

WireFree detectors - Battery powered with up to 2 years battery life

Solutions for hazardous (XP) and non-hazardous (NXP) environments

Many controller and alarm options

Complete portable wireless systems

Calibration Gases and Regulators

Premium quality calibration gases

Large stock of zero air, LEL's, H2S and quads

Stock of many of less common mixtures and exotics

Regulators in a variety of configurations and flow rates

Sizes of 116L, 66L, 58L and 34L for reactivities
105L/103L non-reactives and 11L bump test in stock

Portable Gas Detection

Single Gas Detectors - H2S, CO, O2 and more

4 Gas Personal Monitors

Pumped monitors for confined spaces and purging

VOC and Benzene Detection

Industry leading PID technology from Ion Science

The Titan - The first continuous benzene specific monitor

The Tiger line - Benzene specific, TAC and TVOC models

The Cub - Personal VOC detection

Lightning Detection

State-of-the-art technology from Boltek

Long-range detectors for advance planning

Short-range detectors for accurate alerts

Automated ERL-10 module for simple notification

Flame Detection

Advanced UV/IR and multi-spectrum IR detectors

4-20mA, RS-485 Modbus and relay outputs

Through-the-lens self test feature

5 year sensor and 3 year complete warranty

Process Gas Analyzers

H2S, Total Sulfur, Moisture, CH4, CO2 and O2 Analyzers

Gas Chromatographs & Tunable Filter Spectrometers

Common service parts and H2S tapes in stock
